

ERION TASE

Production Support Specialist

Rocky River, OH 44116 • (904) 864-9213 • ron.tase@gmail.com • linkedin.com/in/erion-tase-669a0a21

PROFESSIONAL SUMMARY

Results-driven Manufacturing Process Engineer with 10+ years of hands-on experience in high-precision medical device manufacturing (MRI coils, PCBA, RF circuits). Proven track record implementing Lean/Six Sigma methodologies, driving process improvements, reducing defects, and leading cross-functional teams of 40+ personnel. Combines a strong engineering foundation (BS Engineering Technology, AS Electrical/Electronic Engineering) with leadership experience and digital/IoT project expertise. Seeking to leverage deep manufacturing, quality, and continuous improvement expertise in a challenging process engineering role.

CORE COMPETENCIES

Lean / Six Sigma Process Improvement PCBA & RF Coil Manufacturing Root Cause Analysis Kaizen / Continuous Improvement ECO Change Management
Manufacturing Instructions (MI) FDA / QA Compliance CAD Supply Chain & Inventory Project Management Safety Compliance
Data Analysis (Python, R, SQL) IoT / Arduino AI & Machine Learning Microsoft Office Suite Wireless Networking Scheduling (100+ employees)

PROFESSIONAL EXPERIENCE

GE Healthcare Coils | Production Support Specialist

Aug 2023 – Present

- Lead new product introductions (NPI) into work centers, developing hands-on and classroom training programs for manufacturing personnel.
- Participate in Pilot Production Teams and kaizen events — identify training gaps, develop process flows, and implement specialized tooling.
- Drive Lean-based process improvements to enhance quality and productivity; monitor, investigate, and resolve defects in collaboration with the quality team.
- Maintain manufacturing documentation currency, implementing ECO changes and supporting testing equipment to sustain uninterrupted production flow.
- Ensure QA procedures and safety standards are consistently applied across assigned product areas, proactively resolving all resource and environment issues.

GE Healthcare Coils | Team Leader

Jan 2020 – Jul 2023

- Supervised 40+ team members across assembly, tuning, and inspection lines for high-precision MRI coil products.
- Partnered with material and engineering teams to maintain production schedules; coordinated daily activities using multiple ERP/database platforms.
- Interfaced with management to design and execute Lean action workouts, reducing waste and improving throughput.
- Redesigned part stock management system, converting disorganized stockpile into a structured inventory that reduced retrieval time and material cost.
- Evaluated and supported engineering models for design improvements, prototypes, and service workflows.

GE Healthcare Coils | Manufacturing Technician

Dec 2018 – Dec 2020

- Tested RF circuit boards (assemblies and sub-assemblies) for operational compliance with performance specifications.
- Tuned analog/digital MRI coils and subassemblies per detailed manufacturing instructions.
- Performed root cause analysis on RF coil failures and simulation equipment irregularities; presented findings and corrective actions to engineering team.

- Conducted controlled experiments, adjusted variables, and recorded diagnostic data to support continuous improvement initiatives.

Best Buy | Geek Squad Manager

Oct 2009 – Jun 2018

- Managed IT product sales and repair operations for a top-performing store location; led a team of 50+ staff across split shifts.
- Grew closing ratio from 15% to 25% through targeted coaching, process refinement, and staff development.
- Sustained 110%+ profitability targets month-over-month by motivating team performance and optimizing operational standards.

Neptun Electronics | Retail General Manager

Sep 2007 – Sep 2009

- Directed operations for a 100+ person retail organization; evaluated performance, productivity, and customer satisfaction metrics.
- Managed monthly P&L, budget planning, financial reporting, and inventory/financial record control.

EDUCATION & CERTIFICATIONS

Bachelor of Science, Engineering Technology

DeVry University | Mar 2023

Lean Six Sigma Certificate

GE Healthcare | Jan 2020

MBA, Information Systems

IUKB, Switzerland | Sep 2009

Bachelor of Science, Management

IWU, Indiana | Sep 2007

Associate of Science, Electrical/Electronic Engineering Technology

Tri-C | Jun 2006

A+, Dell Certified & PC Maintenance Certificate

ENGINEERING & IT PROJECTS

- Designed and deployed an IoT door sensor system using Arduino and Tinker Cad: real-time notifications sent to management smartphones; integrated temperature/humidity monitoring, automated lighting, and flood-level alerts via Thing Speak dashboard with MATLAB data feeds.
- Developed a consumer product rating prediction model using AI/ML techniques (Python, R, SQL) demonstrated practical application of machine learning in a data science pipeline.
